COVER

Three voices, one stage.

A small-caps serif carries the headlines, a precise monospace marks the eyebrows and codes, and Inter handles the running text. All three load from Google Fonts via `next/font`.

BODONI MODA SC

HEADLINES · TITLES · DECORATIVE

Moreška Korčula

est. 1883 — a sword dance kept alive

CSS var `--font-bodoni` · weights 400 / 600 / 700 · italic available

IBM PLEX MONO

EYEBROWS · CODES · TICKET TAGS

TICKET · ZIMSKO KINO · 20:30

CSS var `--font-ibm-plex-mono` · weights 400 / 500 / 600 · uppercase + 0.18em tracking

INTER

BODY · UI · PARAGRAPHS

The Moreška is performed every Monday and Thursday from June through September. Buy your tickets in advance — venues are intimate and the season is short.

CSS var `--font-inter` · variable weight axis · default UI face

NOTES

Headlines use weight 600 (token `--headlineWeight`). Eyebrows are uppercase IBM Plex Mono in gold with wide tracking, finished by a 36 px gold hairline. The file `public/Vinque-Rg.otf` sits in the repo but is not referenced anywhere in CSS — safe to ignore or remove.

Black, parchment, gold, blood.

A cinematic dark palette for the homepage and a warm parchment for the inner pages, tied together by a single gold accent and a deep blood-red call-to-action.

Cinematic, then quiet.

The homepage is dark and cinematic — a full-bleed hero video over black, with a silver-foil gradient on the brand name. Inner pages exhale onto warm parchment, keeping the same Bodoni headlines and gold accents for continuity.

Notes for the designer

- **Plain `<img>` everywhere** — no `next/image` yet, so high-quality source files are enough; multiple sizes aren't needed.
- **"moreška" vs "Moreška"** — lowercase in Croatian (common noun), capitalised in English (proper noun). Important for any new copy or mockups.
- **No em-dashes** in user-visible copy — use commas, colons, or periods. Em-dashes read as "AI-written" in this voice.
- **Hero animation** — overlays fade in at 0 s, logo at 0.3 s, name rises at 0.6 s, "est." line at 1.0 s. Posters are extracted at 0.5 s so first paint is never black.
- **Accent rule** — every eyebrow is followed by a 36 px × 1 px gold hairline. It's the single recurring decorative motif across the site.
